

ICE FLAKING MACHINE

ALS-INS018

DESCRIPTION

The ALS-INS018 Ice Flaking Machines are cutting-edge solutions designed to meet the diverse cooling and preservation needs of industries such as food processing, hospitality, healthcare, and research. These machines produce high-quality granular ice flakes that are uniquely shaped to provide maximum surface area, ensuring rapid cooling and minimal water content. They are engineered to deliver superior performance in environments where precision cooling is critical.

KEY FEATURES

- **Ice Making Capacity:** Ranges from 20 kg to 500 kg per 24 hours.
- **Ice Storage Capacity:** 10 kg to 200 kg, depending on the model.
- **Flake Ice Dispense:** Provides fine, granular ice flakes ideal for diverse applications.
- **Cooling System:** Efficient air cooling for optimal performance.
- **Exterior Build:** Corrosion-resistant Stainless Steel 304 for enhanced durability.
- **Adjustable Feet:** Ensures stability and ease of installation.
- **Slide Away Access Door:** Easy accessibility for hassle-free operation.
- **Top Quality Compressor:** Guarantees reliable performance.
- **Fully Automatic Control System:** Streamlined operations with minimal manual intervention.
- **Improved Design:** Enhanced reliability for continuous usage

TECHNICAL SPECIFICATIONS

ICE FLAKING MACHINE	
Parameters	ALS-INS018ICE
Ice-making capacity	20 kg/24hr
Ice storage	10 kg
Voltage	220V/50Hz
Power	280 watt
Cooling type	Air Cooling
Refrigerants	R134a
Water supply	Tap water
Net weight: kg/Lb	28/61.7
Product dimension: (mm)	405*555*665
